

## Phase V

- Welcome to the fifth and last phase of the project!
- Your task is to fix all the vulnerabilities detected by you or a second group, starting with the most critical.
- Implement any missing functionality.
- Document and clean-up your code.
- Hand-in VM with instructions in README (I will check all implementations).

Deadline:

Tuesday the 8th of July at 05:00. Hand in a document with a summary of what you did. Include lessons learned throughout the project.
